#Day 0 – Pre-event webinar

Joana Simoes

22/01/2026

OGC Code Sprints

- Support the development of the standards.
- Support the development of implementations of the standards.
- Create awareness about the standards.

Share what you will be working during the sprint

The screenshot shows a GitHub issue page for the repository 'opengeospatial/developer-events'. The issue title is 'What is everybody going to be working on, at the 2026 Joint OGC - ASF - OSGeo Sprint? #176'. The issue is open and has 12 issues in the list. The issue was opened by 'doublebyte1' on Dec 11, 2025. The issue description asks for comments on what users will be working on during the sprint. A comment by 'desruisseaux' 2 weeks ago discusses the OGC GeoAPI standard and the plan to prepare GeoAPI 3.1 for submission as a revision of the OGC standard, aligning with ISO 19115 and 19111 standards.

What is everybody going to be working on, at the 2026 Joint OGC - ASF - OSGeo Sprint? #176

The [OGC GeoAPI](#) standard is a set of Java interfaces for using metadata and referencing services of different libraries in an implementation neutral way. GeoAPI is implemented by Apache SIS and has wrappers for PROJ, PROJ4J and GeoTools. The value of GeoAPI is illustrated by the [CRS JSON prototype](#), an experiment done by the OGC CRS Standard Working Group (SWG) for exploring the [encoding of CRS in JSON](#). GeoAPI 3.0 has made possible to write this prototype only once and make it run on 4 independent libraries (PROJ, PROJ4, Geotools and Apache SIS).

During the code sprint, we plan to continue the effort toward preparing GeoAPI 3.1 for submission as a revision of the OGC standard. This revision will align the GeoAPI interface with latest revisions of ISO 19115 and 19111 standard. This alignment is
