

OGC

Open Standards Code Sprint

Mentor stream onboarding

Joana Simoes

20/10/2025

Mentor Stream

- On the mentor stream, participants will have the opportunity to learn about the standards and software projects.
- Check on the wiki page of the event, which Standards Working Groups are participating in the sprint.

👉 <https://github.com/opengeospatial/developer-events/wiki/October-2025-Open-Standards-Code-Sprint#which-ogc-standards-working-groups-are-going-to-participate>

Onboarding Day - Tutorials

11:15 - 12:00 UTC+2 

OGC API - DGGs with the DGGAL
Library

Jerome St-Louis

13:45 - 14:45 UTC+2 

Introduction to STA-WebSub

Andreas Matheus, Joan Masom Núria Julià
and Hylke van der Schaaf

15:00 - 16:00 UTC+2 

Publish OGC API - Records with
GeoNetwork 5

Antonio Cerciello and David Blasby

16:15 - 17:00 UTC+2 

Using OGC API - Joins

Pekka Latvala

19:00 - 20:00 UTC+2 

Introduction to libCartoSym

Jerome St-Louis

Developers at OGC

Open Geospatial Consortium

Exciting New Memberships

OGC will be launching new individual OGC Memberships for Professionals and Developers in 2025. Be among the first to learn more about these new membership levels by filling out this form.

Member Benefits

- Engage with the global OGC Community
- Access OGC Knowledge & Learning Resources

OGC API - Features Course

A new course on the OGC API - Features Standard is now available. Joining a GIS Analyst at a fictional National Mapping and Cadastral Agency (NMCA) you will be introduced to the OGC API Standards, take a deeper dive into the API - Features Standard and, in a practical exercise, deploy and configure a server implementation of the Standard using pygeoapi. To learn more, or to enrol get in touch with [Nigel Edmead](#) or [Joana Simoes](#).

Prerequisites

This course is aimed at geospatial DevOps staff wishing to expand their knowledge publishing geospatial data on the web using OGC API Standards. Learners are expected to be conversant with Command Line Interface (CLI) and have a basic knowledge of Docker, Docker Compose, Git and GitHub.

Developer Membership available at:

https://portal.ogc.org/public_ogc/join_individual/
