OSGeo

Joint Code Sprint 2026

Open

The Apache® Software Foundation (ASF) provides support for the Apache Community of open-source software projects.

Innovation

The Apache projects are defined by collaborative consensus based processes, an open and pragmatic software license, and a desire to create high quality software that leads the way in its field.

Community

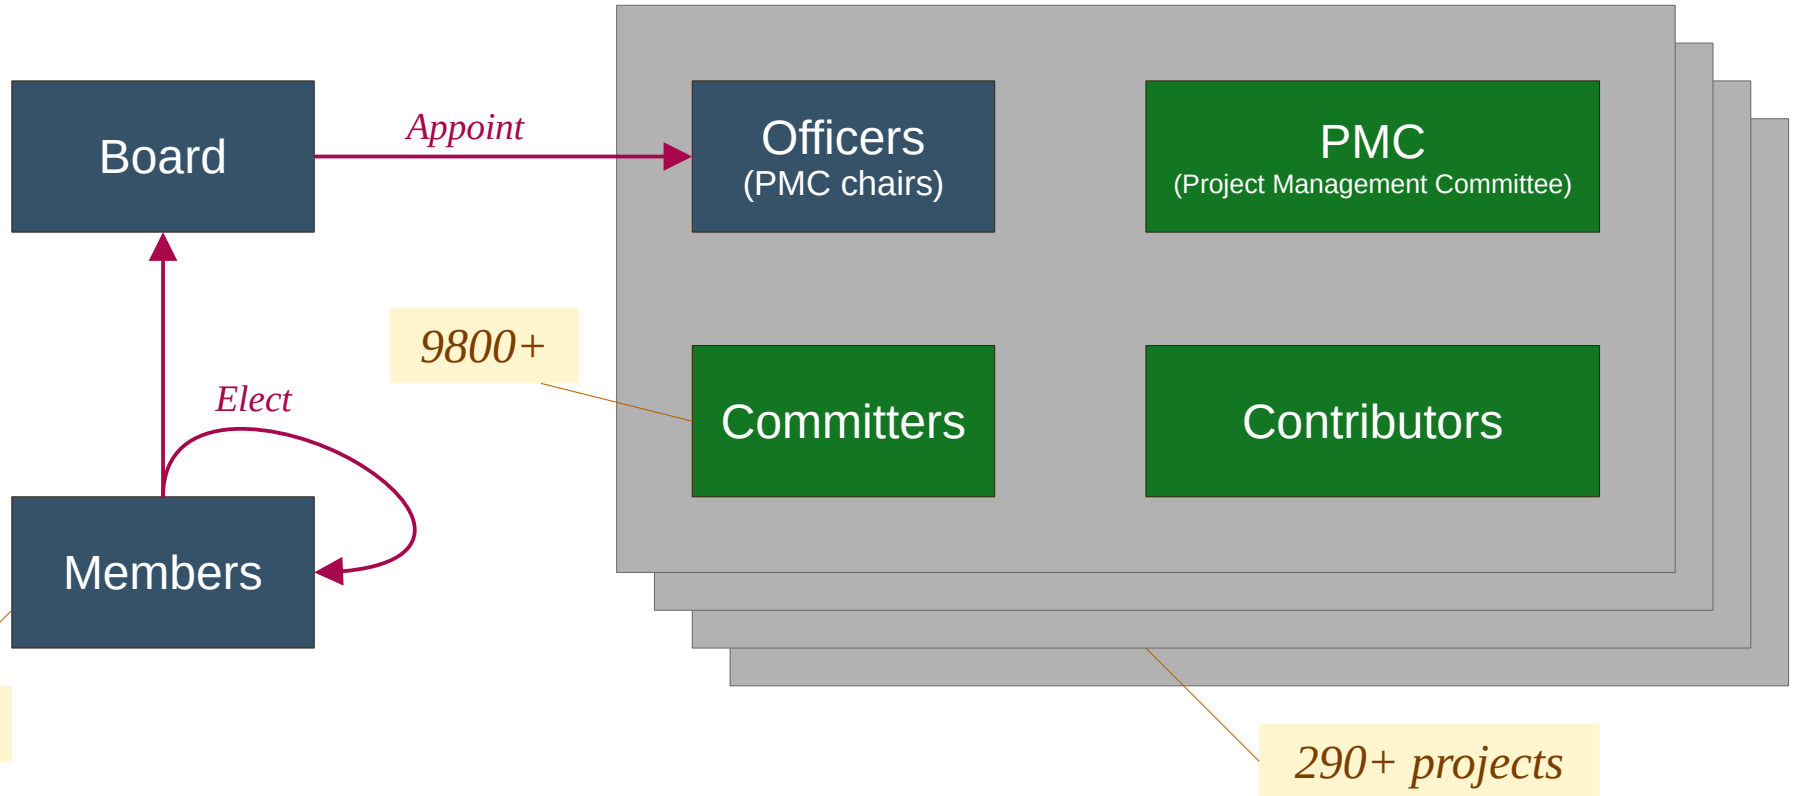

We consider ourselves not simply a group of projects sharing a server, but rather a community of developers and users.

Note: the logo changed

(an oak leaf)

A non-profit cooperation

As public as possible

Per-project mailing lists:

user@	for usage questions
dev@	for development questions
private@	for personal and legal matters

“If it didn’t happen on the mailing list, it didn’t happen”

Foundation-wide mailing lists:

geospatial@apache.org for any Apache projects having geospatial aspects

Projects having geospatial aspects

(non-exhaustive list)

Apache Spatial Information System

<https://sis.apache.org>

- Geospatial library in Java
- Implementation of GeoAPI 3.0.2
- Strong focus on OGC and ISO standards
 - ISO 19111 (referencing by coordinates)
 - ISO 19115 (metadata)
 - Cloud Optimized GeoTIFF, and more

Possible work during code sprint: GIMI

AsterixDB
