

Mentor stream onboarding

OGC Builder Days Code Sprint

Geovation, London, United Kingdom

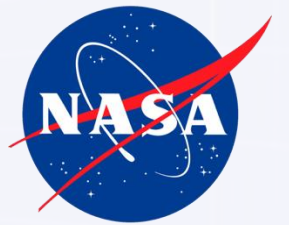

Joana Simoes| OGC

11 May 2026

Meeting Host

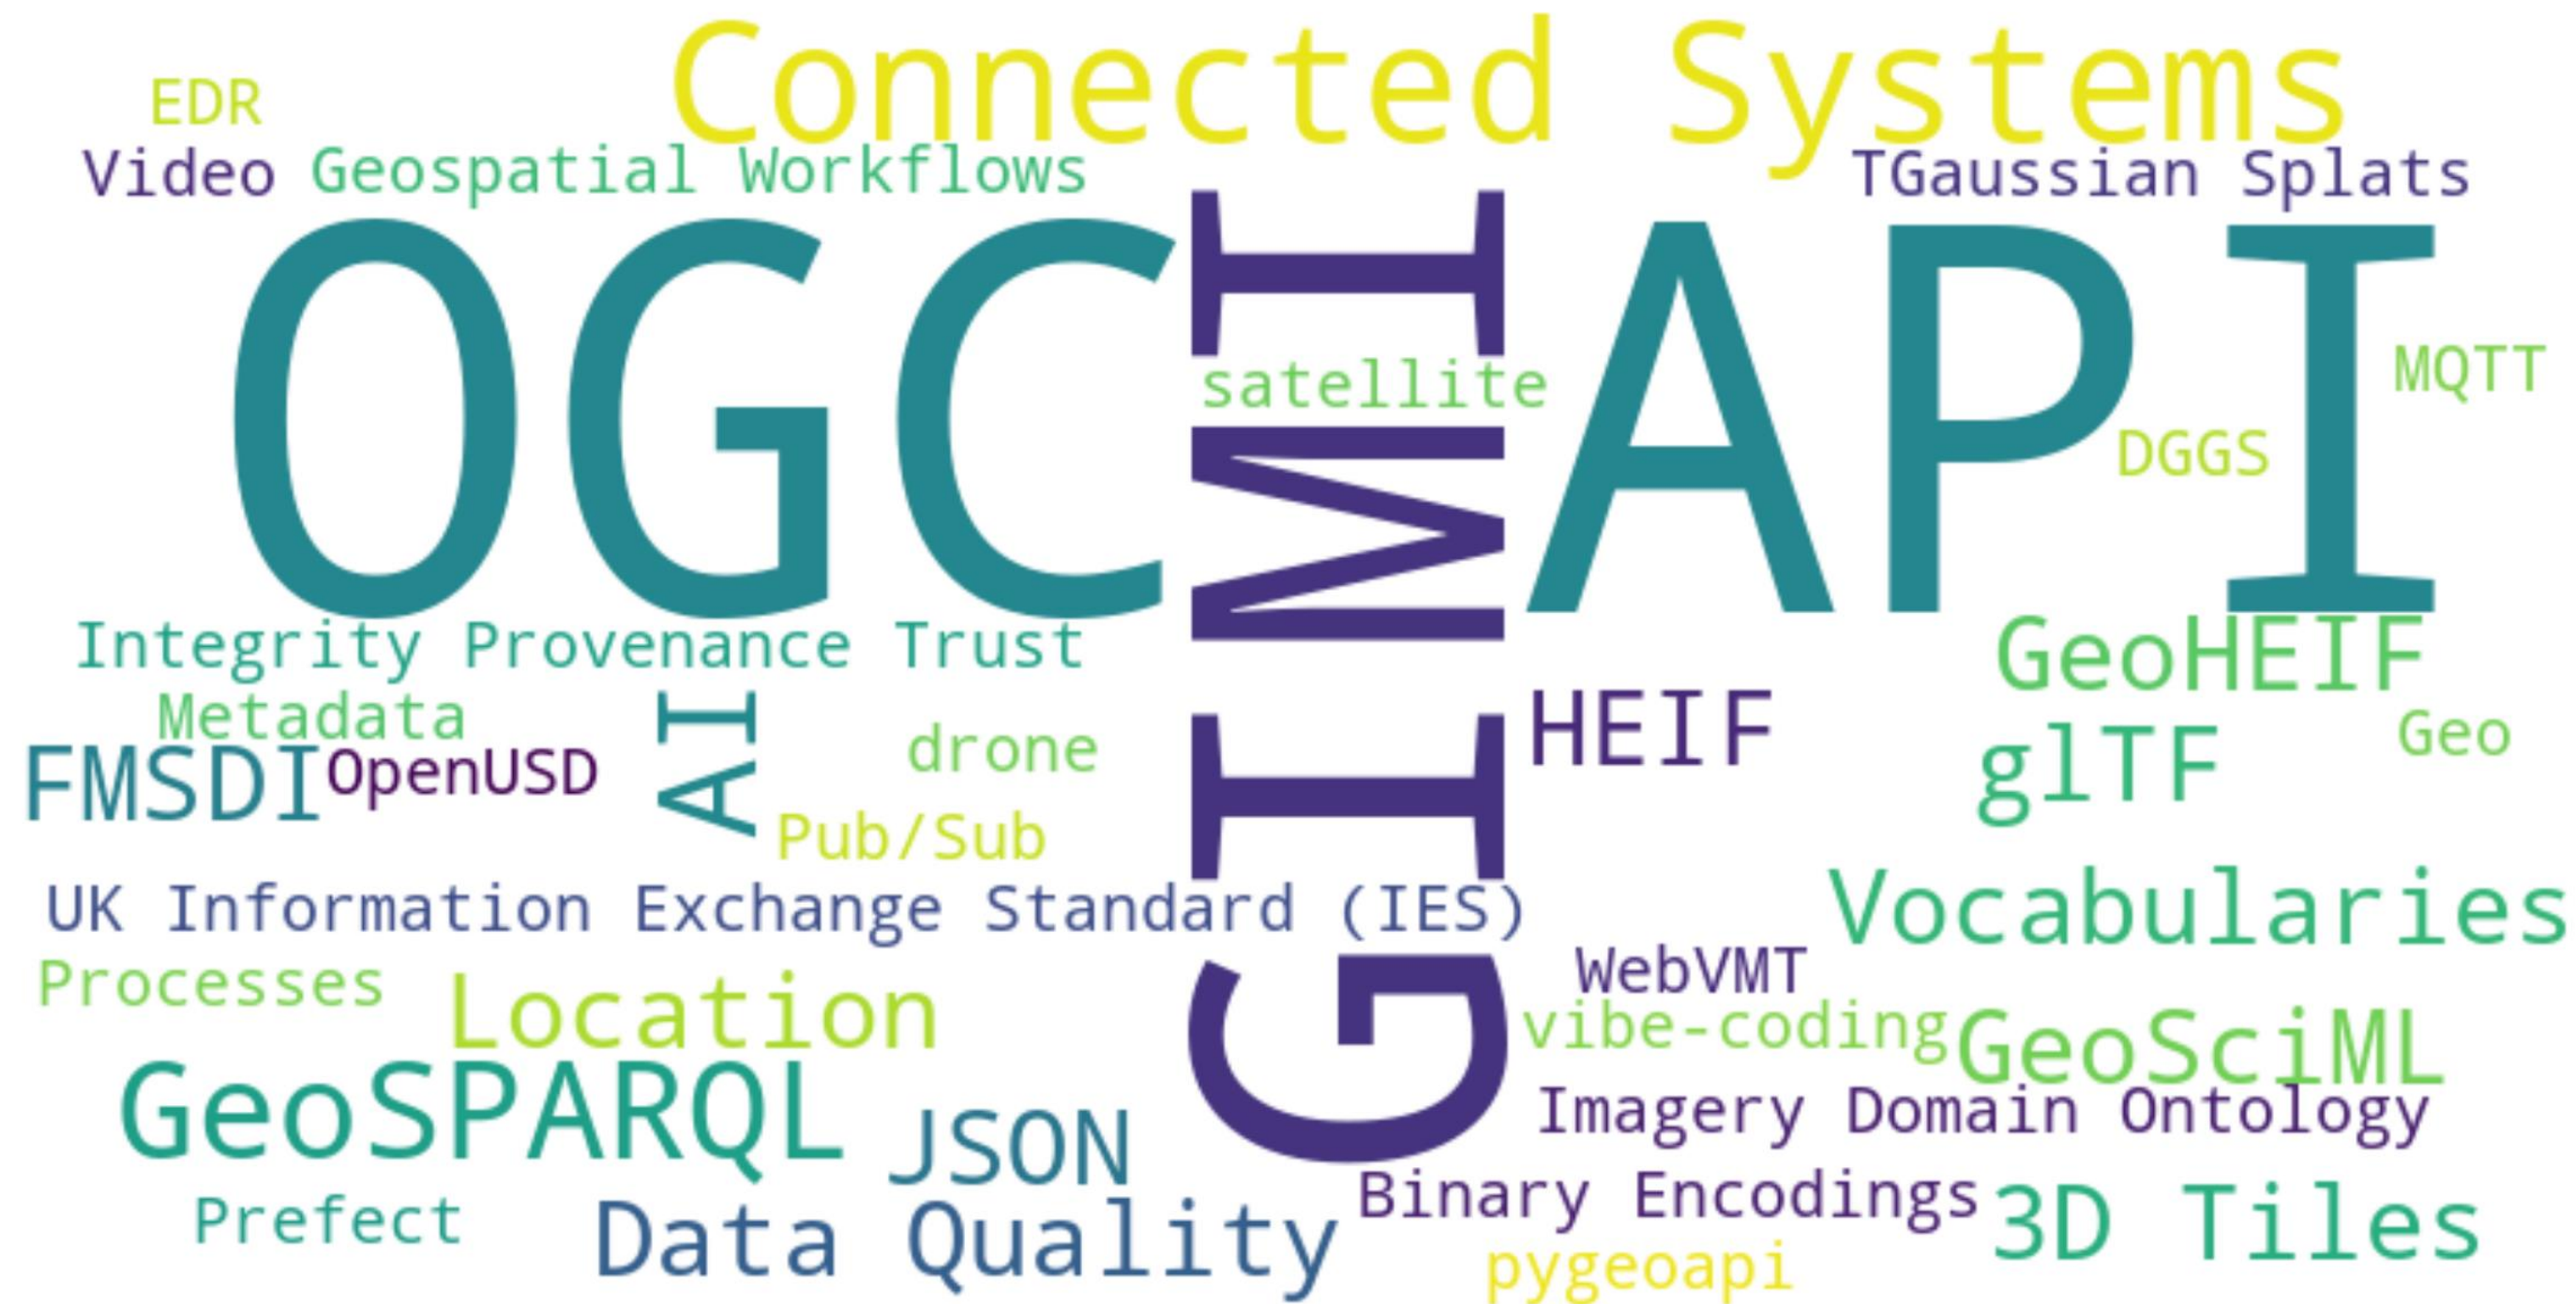

Meeting Sponsor

Mentor Stream

- On the mentor stream, participants will have the opportunity to learn about the standards and software projects.
- Check on the wiki page of the event, which Standards Working Groups and software projects are participating in the sprint.
- Stay on the Microsoft Teams meeting for the tutorials.

Resources

OGC API – Features Course

OGC API - Features Course

A new course on the OGC API - Features Standard is now available. Joining a GIS Analyst at a fictional National Mapping and Cadastral Agency (NMCA) you will be introduced to the OGC API Standards, take a deeper dive into the API - Features Standard and, in a practical exercise, deploy and configure a server implementation of the Standard using pygeoapi. To learn more, or to enrol get in touch with [Nigel Edmead](#) or [Joana Simoes](#).

Prerequisites

This course is aimed at geospatial DevOps staff wishing to expand their knowledge publishing geospatial data on the web using OGC API Standards. Learners are expected to be conversant with Command Line Interface (CLI) and have a basic knowledge of Docker, Docker Compose, Git and GitHub.

THANK YOU
