Google Trend for “geospatial API”

The lack of interoperability
can lead to less optimal solutions...

What is OGC?

Our Vision

Building the future of location with community and technology for the good of society.

Our Mission

Make location Information Findable, Accessible, Interoperable and Reusable (FAIR)

Our Approach

A proven collaborative and agile process combining consensus-based standards, innovation project and partnership building.

OGC Code Sprints

- Support the development of the standards.
- Support the development of implementations of the standards.
- Create awareness about the standards.

Open to All OGC standards
